How to Search Google for Government Publications

Google searches are very useful. For best results, limit your searches to specific government web sites.

For example:

To find information on technology transfer in Alberta search for: technology transfer site:.gov.ab.ca OR site:.alberta.ca

By adding site:.gov.ab.ca to your search terms you limit the Google search to Government of Alberta sites only.

For Ontario Government sites add: site:.gov.on.ca; for Manitoba add: site.gov.mb.ca and so on.
