Filtering Search Results in Primo VE

Including and Excluding Multiple Facets

When facets are added one at a time, the system returns the remaining results that match the selected facet value. You can specify more complex filtering if you select multiple facets and then apply them to the results at the same time. For example, if you select Subject facet values Agriculture and Botany and Resource Type facet values Book and Other, the system returns results that include all records that match the following criteria:

- The records must contain either Agriculture or Botany subjects.
- And the records must be either Book or Other resource types.

If you had selected these facet values separately, the resulting records would have to contain all of these facet values.

To include/exclude multiple facets at a time:

1. Perform a search.

2. For each facet that you want to include and exclude, hover over the facet in the Tweak my results section of the UI and then perform one of the following actions:
Include facet – Select the check box on the left side of the facet. If you want to include a facet that has already been marked for exclusion, click the 

![check box](image)

button on the right side of the facet.

Exclude facet – If you have already included a facet, click the 

![exclusion button](image)

button on the right side of the facet to mark it for exclusion. If you have not already marked a facet for exclusion or inclusion, you must first select the facet's check box and the click the 

![exclusion button](image)

button on the right side of the facet. Otherwise, a single facet will be excluded immediately.

3. Click **Apply Filters** to filter your results. The selected facets will appear in the Active filters section.

---

**Adding Persistent Facets**

When performing many similar types of searches, you may want to retain your filters for subsequent searches within a session.

To make a facet persistent, hover the cursor over the facet in the Active filters section and then click the facet's padlock 

![padlock](image)
Add Sticky Facet

To remove a facet's persistence, click the facet's padlock

or delete the facet.

Remove Sticky Facet
